

PROCESSOR CHEMICALS

Advanced Chemistry for optimum processor performance

www.velopex.com www.velopexusa.com www.velopex.fr

Velopex x-ray processor chemicals are manufactured by Velopex under stringently controlled conditions. These superior quality developers and fixers offer important benefits in terms of processing performance, chemical life and ease of use. Recommended for use in all Velopex processors, they are also suitable for most other automatic x-ray film processing machines.

Velopex chemicals are available in a choice of Ready-to-Use solutions and One-plus-One concentrates requiring 1:1 dilution with water.

Ready-to-Use Solutions

Velopex pre-mixed Developer and Fixer are supplied in 5 litre colour-coded bottles, ready for immediate use. They offer a long shelf life, and may be used for manual replenishing or in an automatic replenisher.

Velopex Ready-to-Use Developer ensures:

- high quality processing in most modern processors without the need for glutaraldehyde hardener.
- excellent stability in part-filled bottles and in machines on standby
- compatibility with all screen and non-screen x-ray film types
- good resistance to background fogging at higher temperatures
- clean, clear radiographs through the minimising of black deposits

Velopex Ready-to-Use Fixer offers:

- rapid clearing time
- low levels of sulphur dioxide fumes and aluminium hardener

One-plus-One Concentrates

Concentrate packs - Now Discontinued
