

Simplicity[®] No Rinse Adhesive System

Simplicity[®] No Rinse Adhesive system combines the three most important features of flawless bonding. It's the only system on the market that provides consistency, versatility, and speed in the same package.

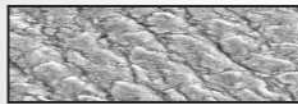

Common results: No sensitivity, excellent bond strengths, and superior long-term performance

Number of procedures: 2 (1 extra coat of Simplicity[®] 2 for indirect procedures)

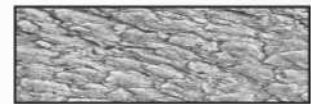

Indications for use: All bonding protocols

Total application time: Less than 50 seconds

Simplicity[®] produces etching results identical to a 37% phosphoric acid gel etch (See pictures below). This level of etch eliminates concerns about enamel bonding and ensures long-term margin integrity.

Enamel etched with 37% Phosphoric acid

Enamel etched with Simplicity[®] 1

The ease of use of this product coupled with the versatility and consistently superior results make Simplicity[®] the only bonding system for your practice.
