

# SURPASS SELF-ETCH BONDING SYSTEM

## The Gold Standard in Dental Adhesion

Independently each SURPASS<sup>®</sup> bottle optimizes an attribute critical to clinical success. When used as a system, SURPASS<sup>®</sup> is the new Gold Standard in dental adhesion.

- The conditioner etches enamel as well as phosphoric acid while eliminating post operative sensitivity
- The primer completely wets and penetrates the tooth structure to maximize bond strengths and completely seal the surface
- The bonding resin links the primed surface to all self cure, dual cure or light cure restorative materials
- SURPASS<sup>®</sup> has only one technique for all procedures
- There are no catalysts needed for any procedures
- SURPASS<sup>®</sup> offers the highest bond strengths ever achieved

**SURPASS<sup>®</sup> is....The Gold Standard in Dental Adhesion.**
