

The Future is...

AQUACUT Quattro

“Why Aquacut Quattro?”

- ✓ Powder, air and water to cut with a ‘slurry’
- ✓ Greater efficiency of cutting at lower air pressures, making the Aquacut Quattro the ideal choice of clinicians and patients
- ✓ No heat, no vibration, no nasty smells, no turbine noise makes the Aquacut a favourite

- Q1** Cavity preparation/ composite repair/ preventative resin restorations excellent results, quick and easy
- Q2** Stain removal/ prophylaxis - fantastic results- quickly
- Q3** 3-in-1 Syringe wash/dry with the same handpiece as Q1 and Q2
- Q4** Sand Blaster/ Micro etcher excellent to tidy up lab work or clean up de-bonded crowns

The handpiece is as light and as easy to manoeuvre as a pen

With the Aquacut handpiece you get greater control and flexibility

The Future is...

AQUACUT Quattro

The Benefits

- ▣ Make life easier with quick, easy and efficient procedures eg. Composite repair and Preventative resin restorations (PRR's)
- ▣ Versatile - able to clean, treat, wash and dry
- ▣ Reduces the need for local anaesthesia
- ▣ Fully portable and easy to operate
- ▣ Use for Stain removal - polishing before your scaler for a faster and more efficient procedure
- ▣ Etch all tooth surfaces before bonding for longer lasting restorations

The Twin Chamber unit with 3-in-1 foot control features dry air, water spray, tooth cutting and cleaning - all through THE SAME handpiece. The design of the Aquacut enables the dentist to change from cutting mode to cleaning at the turn of a switch.

What does this mean for YOU?

Not only do you get the many benefits from using the Aquacut system, but this new unit allows the patient to have a more comfortable treatment. Using this unit allows you to SAVE time.

FINANCIAL SENSE

Faster than a hard tissue laser, without any of the risks and at a fraction of the cost.

Cleaning and stain removal - use Aquacut before your ultrasonic scaler for a standard 'scale and polish' **save 5 minutes!**

Use to open/clean fissures before fissure sealants **save 5 minutes!**

Repairing rather than replacing composites **save 10 minutes!**

SAVING 20 MINUTES!! = means you can get to treat one more patient!
