

DENTAL TREATMENT CENTRE

A new level of expertise in your dental practice

www.velopex.com www.velopexusa.com www.velopex.fr

The Velopex Dental Treatment Centre is an all-in-one mobile treatment unit for hard and soft tissue procedures. Incorporating the Velopex Aquacut Quattro, Velopex Diode Laser and the Velopex Zephyr 150 compressor. The Dental Treatment Centre is the ideal product for any surgery and able to provide all of the compressed air required. It requires only a single power point, avoiding any need for complicated installation. Extra power points can be mounted on the stand to enable a combination of other dental equipment to be carried, such as an ultrasonic scaler or air driven piezo scaler.

The modular Dental Treatment Centre enables you to select and build up the system that suits your needs in the most affordable manner.

Purchase the complete unit outright or just those modules that suit your needs. The system enables you to make any combination of modules - as you require.
