

Exquisite Restoration

Exquisite Restoration™ is a visible light-activated, nanofill composite for anterior and posterior restorations. Beside its low shrink and low abrasion, **Exquisite Restoration™** has exceptional handling and provides excellent mechanical properties.

Exquisite Restoration™ is highly radiopaque and is very wear resistant.

Available in Syringes or Unit Doses.

Features:

- Low Shrink
- Improved Wear Resistance
- Highly Sculptable Consistency
- Excellent Gloss and Polishability
- High Filler Loading

Benefits:

- Low Stress Restorations
- Long-term Durability and High Hardness
- Non Sticky, Easy to Handle
- Highly Sculptable
- Beautiful, Esthetic Restorations
