

VELOPEX[®] md3000

The NEW Velopex MD3000 is the market leader for large film media X-ray Film processing.

The MD3000 has a range of new features to help you work to your maximum potential, all the while maintaining high quality X-rays, the smooth running of your practice and maximising the time with your patients.

An advance our previous model, the MD3000 is lighter, smaller and more efficient within your practice. With a modern and clean design, this machine is the clear choice for your X-ray processing needs.

ALL NEW FEATURES:-

Self-Draining Cycle

Eliminates the need to drain your X-ray film processor manually. With the touch of a button, the machine removes all chemical from its modules.

Self-Cleaning Cycle

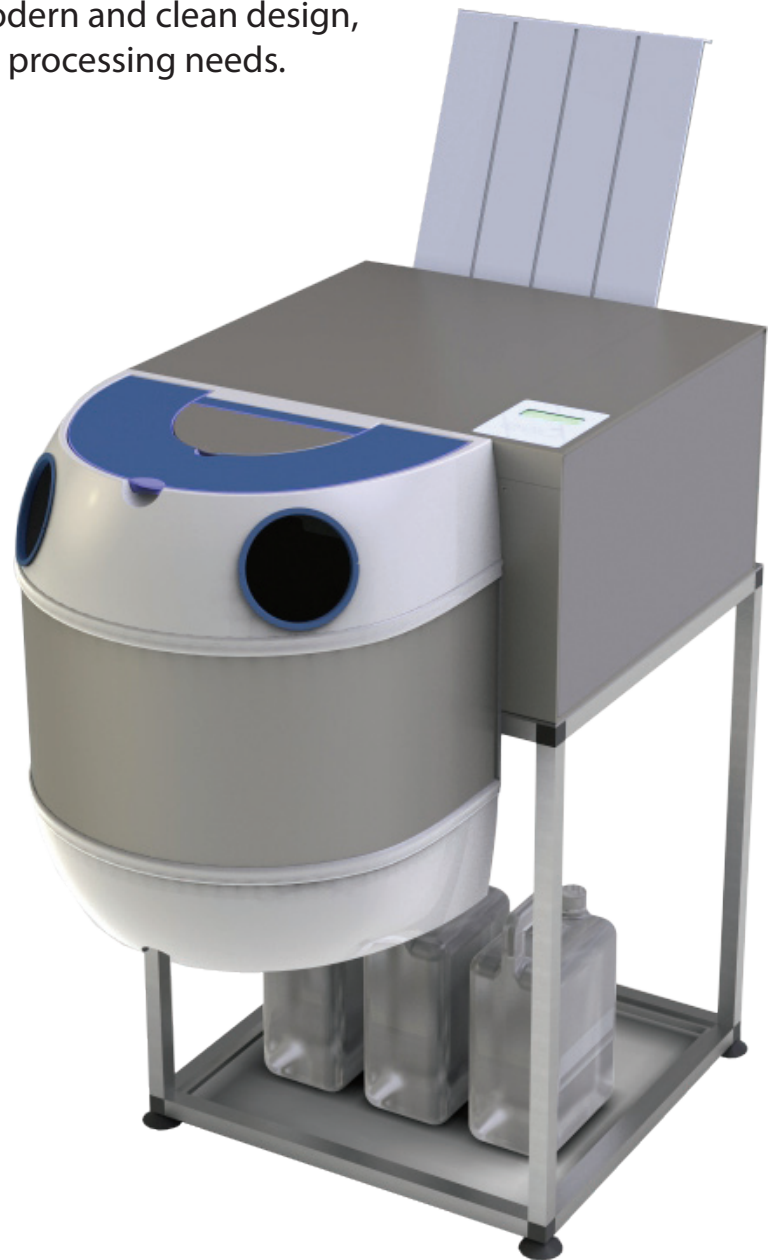

You will no longer have to take time out of your week cleaning your X-ray film processor. Through the machine's menu, it can be set to perform its own cleaning cycle.

Replenishment Cycle

The MD3000 helps to maintain the quality of your X-rays further by agitating each chemical within its module, extending its effective life span, reducing the need to replace your chemical and saving you money!
