

RE-GEN PIT & FISSURE SEALANT

RE-GEN™ Pit & Fissure Sealant

RE-GEN™ Pit & Fissure Sealant is a hydrophilic, **wet bond material**, that bonds remarkably well in a moist environment. Because of its bioactive properties, RE-GEN™ is able to prevent demineralization and inhibit secondary caries at the margin, ensuring exceptional margin stability.

- Releases biologically charged ions (phosphate, calcium, fluoride) which enhances enamel remineralization, increases enamel hardness, and stimulates hydroxyapatite formation
- Low solubility of 0.06%
- Film thickness of 20-25 microns
- BPA & Bis-GMA Free
