

ZR-P Zirconia Primer

ZR-P Zirconia Primer

ZR-P is a primer that increases the bond strength between zirconia, alumina, and metal surfaces and resin materials.

By combining two active monomers, **ZR-P** provides exceptional bond strength to the most challenging substrates.

- Provides high bond strengths to zirconia, alumina, and metal restorations
- Bond strengths that allow for the delivery of partial coverage indirects
- Convenient bottle and syringe delivery options
- Enhances bond strengths of resin adhesives, RMGI's and GI
